Management system certification - ISO [4]

Having a certified management system is often a precondition to be in a position to win contracts in many business sectors as well as public sectors. Nemko has more than 25 years experience in management system certification, with well qualified and experienced auditors. In addition to conformity assessment, we strive to add value to our clients in the way we conduct our audits. As well, we offer training in auditing technics, quality and environmental management as well as risk management.

Pre-shipment inspection help ease your international transaction [7]

During the international business and trading process, when you need to make sure you receive the correct goods as you have ordered, asking for a third party Pre-shipment inspection is a wise choice.

Pre-shipment inspection (PSI) is also known as Final Random Inspection. It is performed when 100% of the products are finished with at least 80% of export cartons packed. During the inspection, products will randomly be selected for checking by our inspection according to AQL standards.

_[8]

Vendor inspection can be a solution to find your suitable business partner [8]

[8]

In the international business and trading process, using an expert third party vender inspection is a good solution to help you build up trustable business relationship with your venders.

Vender inspection may involve checking of a factory's facility and quality control capability. Third party vender inspection may help you choose the right vender to build up business relationship with. In order to ensure the order complies with

your specifications and delivery terms, vendor inspection may also be carried out to monitor the manufacturing process and assure compliance.
