

The GS certification mark provides you market access to Europe`s biggest market

The GS certification mark (GS= Geprüfte Sicherheit/Approved Safety) is applicable for a wide range of products, including electrical equipment.

The GS mark is voluntary but widely recognized as a safety mark within Germany and in German-speaking countries. A GS certification involves a third party to verify compliance with safety requirements in Europe.

Nemko is a recognized GS testing and certification body, including approved test facilities around the globe.

What is GS?

- Confirmation that a product is safe
- Includes electrical Safety as well as ergonomics
- Compliance with requirements for toxic substances
- Including Factory surveillance
- Confirm compliance with ProdSG
- Certification may be issued up to 5 years
