

Management system certification - ISO

We deliver the following certification services:

[1]

[ISO 9001- Quality management system](#) [1]

ISO 9001:2015 is the quality management system standard designed to create a more efficient and effective business operation.

Certification of the quality management system is a confirmation from an independent, competent and accredited agency that the business adheres to the requirements of an internationally recognized quality management system standard.

[2]

[ISO/IEC 27001 - Information security management system](#) [2]

ISO/IEC 27001:2017 is the information security management system standard designed to specify the requirements for implementation of security controls within an individual organization. It also covers physical control and IT security issues.

[3]

[ISO 22301 - Business continuity management systems](#) [3]

NS-EN ISO 22301:2014 - Societal security - Business continuity management systems (BCMS)

[4]

[ISO 14001 - Environmental management system](#) [4]

ISO 14001:2015 helps the organization to manage its environmental aspects and is fundamental for environmental improvements.

Certification to this environmental management system is an effective means to achieve credibility. It has been shown that certification to ISO 14001 helps in achieving market access in areas where a good reputation related to environmental awareness is important and where effective environmental management is a criteria for being approved as a supplier.

[5]

[ISO 45001/ OHSAS 18001 – Occupational health and safety](#) [5]

Occupational Health Safety Assessment System (OHSAS) 18001 is an international standard for occupation health and safety management systems. In 2018 the new standard for occupation health and safety ISO 45001 was released.

ISO 45001:2018/ OHSAS 18001:2007 is a combined management system for the working environment and safety similar to what is used for quality assurance within a company.

[6]

[ISO 50001 – Energy management systems](#) [6]

ISO 50001:2018 helps the organization to manage its energy aspects and is fundamental for energy improvements.

Certification to this energy management system is an effective means to achieve credibility. Making buildings more energy efficient cuts costs, offers market-beating investment returns, and protects companies from rising energy prices. It is also important where effective energy management is a criteria for being approved as a supplier.

[7]

[ISO 22000 - Food safety management system](#) [7]

ISO 22000:2018 is the food safety management system standard where an organization demonstrates its ability to control food safety hazards to ensure that food is safe for human consumption.

ISO 22000:2018 is applicable to all types of organizations, regardless of size, which are involved in any aspect of the food chain.

[8]

[IQNet The International Certification Network](#) [8]

Nemko AS is the only Norwegian member of the IQNet - The International Certification Network.

IQNet is the central body representing 36 national and international certification companies with a network of more than 200 subsidiaries worldwide. The IQNet certificate grants to customers the use of IQNet exclusive registered mark, which is known around the world as a synonym of Quality.

[9]

[ISO 13485 Certification](#) [9]

ISO 13485:2016 is used by organisations involved in one or more stages of the life-cycle of a medical device. The central purpose of the ISO 13485:2016 standard is to verify that the organisation fulfils the requirements for a quality management system specific to the medical devices industry.
