

Pre-shipment inspection help ease your international transaction

Nemko have qualified inspectors in the following product categories:

- IT equipment
- Audio/ Video Equipment
- Household appliances
- Lighting & Luminaries
- Components & Accessory
- Power Tools

During the inspection, our inspector normally takes reference to the standard samples and make sure that the quality, colors, measurement, appearance, shipment quantity, packaging and all special requirements meet with the customer's specifications and relevant international standards.

Related information

In addition to pre-shipment inspection, Nemko also offers:

Pre-production Inspection

Before the actual production begins, our inspectors are available to inspect, by random sampling, the raw materials, components and accessories to be used in production, which will help the customer to counter check if the factory has ordered the correct materials and components.

During Production Inspection

As soon as the first goods come off the production lines, our inspectors may be there to check for any defects or deviation from quality parameters and follow up that these are rectified further in the product process.
