

# International Approval

"Trade Barriers" are restrictions that government impose in the form of product testing and certification requirements. Manufacturers must overcome these barriers for Global Market Access. Creating a product that meets the regulations of all the leading markets in the world is a valuable approach for the manufacturers. However the process of obtaining different approvals for different markets can be completed, time consuming and expensive. If not handled properly the company would lose its competitive edge despite a high level product. Nemko Direct (excluding India) conquers barriers and give you regulatory access to the countries (International approvals) you want in the shortest possible time. You let Nemko Direct (excluding India) undertake the burden of submitting an application, necessary documentation, to follow-up, and communicate with foreign approvals agencies. Through our unique combination of local presence, international networks, and bi-lateral agreements Nemko Direct (excluding India) has obtained more than twenty thousand certificates during the last fifteen years. Through our IA program (International approval), you can cover your certification needs for Europe, North America, Telecom & wireless equipment certification with Nemko Canada & Gulf states.

## How Nemko can help :

1. Faster [market access](#) [1] for your product
2. Flexible and non-bureaucratic service
3. One-stop-shopping service
4. "Leave your burdens to Nemko"
